Workshop Objectives

- * To enlarge the CYTED-RedTrV platform for knowledge exchange among participants from Latin America and Europe.
- * To inform interested stakeholders about the current Chagas disease burden and control strategies.
- * To discuss current and future methods and technologies oriented to control triatomines and other insect vectors.
- * To inform stakeholders about European and Latin American perspectives, policies and legislation on sustainability aspects of biopesticides production.
- * To get feedback from associations, industry sector, and research organizations about using *Triatoma virus* as biological control agent.
- * To assess research needs and cooperation opportunities between scientists working on human and animal trypanosomiasis, insect vectors, and viruses.

Workshop Fees: Participants 100€. Staff members of the UCDT/CMDT and members of the CYTED- RedTrV 50€.
